

Author Guidelines

The authors are requested to prepare their manuscripts as per the instructions or specifications given below. It should be noted that the review process is solely depend upon the significance of the work and the care used by authors to represent it, in the form of their manuscripts. Therefore, authors are strongly encouraged to read these instructions carefully before preparing/submitting their manuscript for publication

Manuscript Format

The preferred format of all manuscript is MS Word. Figures and images must be inserted in the manuscript at the position they should appear when published.

Preparation of manuscript

The language of the journal is English. Each manuscript should be typed double-spaced on A4 (8.27 × 11.69) paper size with 1 inch margins and 1.5 inch spacing. It should be arranged in the following order:

- a. Title
- b. Abstract
- c. Keywords
- d. Introduction
- e. Materials & Methods
- f. Results & Discussion
- g. Conclusion
- h. Acknowledgement
- i. References

Title Page:

Title page should contain title of the paper in bold face, title case (font size 14), names of the authors in normal face, upper case (font size 12) followed by the address in normal face lower case. The author to whom all correspondence be addressed should be denoted by an asterisk mark. The title should be as short as possible and precisely indicate the nature of the work in the communication. Names of the authors should appear as initials followed by surnames. At the bottom left corner of the title page, please mention “*Address For correspondence” and provide a functional e-mail address.

Abstract: Should start on a new page after the title page and should be typed in single-space to distinguish it from the Introduction. Abstracts should briefly reflect all aspects of the study, as most databases list mainly abstracts.

Key-words: Provide four to six appropriate key words after abstract.

Introduction:

Shall start immediately after the Abstract, as the next paragraph, but should be typed in double-space. The Introduction should lead the reader to the importance of the study; tie-up published literature with the aims of the study and clearly states the rationale behind the investigation.

Materials and Methods:

Shall start as a continuation to introduction on the same page. All important materials used along with their source shall be mentioned. The main methods used shall be briefly described, citing references. Trivial details may be avoided. New methods or substantially modified methods may be described in sufficient detail.

Results and Discussions:

All findings presented in tabular or graphical form shall be described in this section. The data should be statistically analyzed and the level of significance stated. Data that is not statistically significant need only to be mentioned in the text – no illustration is necessary. All Tables and figures must have a title or caption and a legend to make them self-explanatory. Discussion must be written with reference to the tables and figures and by considering information from the literature and should contain a short review of the results. Any Statements made in the any above sections should not be repeated here. There is no restriction for result and discussion to be written separately.

References:

It should be numbered consecutively in the order in which they are first mentioned in the text (not in alphabetic order). Identify references in text, tables and legends by Arabic numerals in superscript in square brackets. References cited only in tables or figure legends should be numbered in accordance with the sequence established by the first identification in the text of the particular table or figure.

Journal Articles

Tables and figures

Tables:

Each table must be given on a separate page with a brief but complete and self explanatory caption so that the reader can easily understand the results presented in the table. Please do not duplicate material that is already presented in the figures.

Figures:

Photos or drawings must have a good contrast of dark and light. Legends of figures should be brief, but complete and self- explanatory so that the reader can easily understand the results presented in the figure. Please do not duplicate material that is already presented in the tables.

Ethical matter

Authors using experimental animals and human subjects in their investigation must seek approval from the appropriate Ethical Committee. The method section must include a statement to prove that the investigation was approved and that informed consent was obtained. Authors have to submit scan copy of their Approval Certificate as an attachment via editor's email id and in cover note they have to mention their protocol number.

Short Communications

The journal publishes exciting findings, preliminary data or studies that did not yield enough information to make a full paper as short communications. These have the same format requirements as full papers but are only up to 10 pages in length in total. Short Communications should not have subtitles such as Introduction, Materials and Methods, Results and Discussion- all these have to be merged into the running text. Short Communications preferably should have only 3-4 illustrations.

Review Articles

Should be about 15-25 pages long, contain up-to-date information, comprehensively cover relevant literature and preferably be written by scientists who have in-depth knowledge on the topic. All format requirements are same as those applicable to full papers. Review articles need not be divided into sections such as materials and Methods and Results and Discussion, but should definitely have an Abstract, Keywords and Introduction, if necessary.

Submission of Manuscript

All manuscripts (must be in English and in MS Word format) and should be submitted via our online system or through email at: pharmaresearchlibrary@gmail.com as an attachment for quick evaluation.

Copyright and Permissions

Submission is a representation that the manuscript has not been published previously and is not under consideration for publication elsewhere. Authors would be required to sign a form (to be supplied by the Editor) transferring copyright before the manuscript can be published. By submitting a manuscript to the editor or publisher you are deemed to have granted permission to publish the manuscript.

Submission Check List

The following items should be supplied while submitting

1. Manuscript
2. Cover letter

Processing Charges: Pharma Research Library publishes all its journals in full open access format which are easily accessible for scientific community. PRL does not have any income source like subscription charges of author (s). Therefore, Pharma Research Library publishes needs to defray its production and maintenance costs by collecting maintenance charges from author, author's institutes or research funding bodies. These charges are only for maintaining of your article for long time in our website, PRL not collecting any publication charges.

Note: Authors are requested to send their research articles strictly according to the given format mentioned in the guidelines to the authors.
